EDUCATION

B.Tech in Computer Science and Engineering Dumka Engineering College

10/2021 - Present

Dumka | CGPA: 7.6

Courses

- Data Structures and Algorithms: Explored fundamental data structures and algorithms for efficient problem-solving.
- Object-Oriented Programming (OOPs): Applied principles of OOPs for creating modular and reusable code.
- Database Management Systems (DBMS): Studying databases, SQL querying, and ensuring data integrity.
- Operating Systems: Learning key concepts of operating systems, including process management, memory allocation, and file systems. Learned about scheduling, resource management, and system security.

12th Grade

Mother's International Academy

05/2018 - 05/2020

Madhupur | 72%

GIRLSCRIPT SUMMER OF CODE

Contributor

GirlsScript Foundation

05/2023 - Present

Achievements/Tasks

- Made significant contributions to the projects assigned, enhancing its functionality and performance.
- Leveraged React and Tailwind CSS to develop responsive and user-friendly frontend components, enhancing the overall user experience.
- Utilized version control systems, like Git, for efficient code management and integration.
